- Malakoff Corporation and Solarvest Holdings announced that their consortium has received a notification from the Energy Commission that it has been shortlisted as a bidder to undertake the development of a 470MWac LSS plant in Larut and Matang, Perak.
- Malakoff's stake in the consortium is 80% while Solarvest's equity interest is 20%.
- We view the potential award positively as it would increase Malakoff's RE exposure. Malakoff's RE generating capacity is only 198MW currently. This is Malakoff's first LSS win after failing to be awarded in the previous LSS tenders.
- The 470MW LSS plant would increase Malakoff's total effective generating capacity from 4,992MW to 5,368MW. This excludes Prai Power Plant, which expired on 30 August 2025.
- Assuming a tariff of 18 sen/kWh, we estimate that the LSS plant would generate revenue of RM163mil per year. Assuming a pre-tax profit margin of 20% and based on Malakoff's 80% stake, we estimate that the LSS would generate pre-tax profit of RM26mil per year. This is about 6% of the group's FY26F pre-tax earnings.
- Risk is the rising cost of solar panels, which may affect the profit margins of the project. According to *Bloomberg*, the price of polysilicon, which is used to produce solar panels, has increased by more than 30% since the middle of July.
- We think that the LSS plant would be completed in late-FY27F or early-FY28F. Hence, earnings contribution would only come in FY28F.
- We maintain HOLD on Malakoff with a target price of RM0.88/share. Our target price is based on a FY26F PE of 14x, which is the five-year average.
